

At the CTT Moscow 2015, Liebherr displays Construction Machines for the Russian Market

- Liebherr open air exhibition stand at the CTT Moscow, Stand E-2
- Exhibits from the fields of earthmoving, special foundations, material handling, tower cranes, concrete technology and components

Moscow (Russia), 2 June 2015 – The Liebherr Group is present at the CTT Moscow, the international trade fair for construction machinery and technology, from 2 to 6 June 2015 with a 1,700 m² open air exhibition stand (Stand E-2).

The Liebherr Group offers trade visitors to the CTT Moscow 2015 an overview of its current range of construction machines from the fields of earthmoving, special foundations, materials handling, tower cranes, concrete technology and components.

In Moscow, Liebherr presents a total of five mobile cranes, a telescopic crawler crane and a tower crane from its range. From the range of earthmoving and material handling machines and special deep foundation equipment, Liebherr exhibits two crawler tractors, a pipe layer, three mobile and one crawler excavator plus two wheel loaders and a piling rig. Concrete technology products will be represented at the CTT 2015 with a truck mixer and a truck-mounted concrete pump.

The highlights on the Liebherr stand at the CTT include the PR 734-4 crawler tractor, the R 916 crawler excavator, the LRH 100 piling rig, the 43 R4 XXT truck-mounted concrete pump, the LTR 1060 telescopic crawler crane and the 150 EC-B 8 Litronic flat-top crane.

On the exhibition stand, Liebherr also provides information about the remanufacturing program for reconditioning components, which opened at the Russian plant in Nizhny Novgorod in December 2014.
