

Liebherr-Rusland Customer days attracted over 1500 company's clients

Moscow (Russia), July 2018 – Liebherr-Rusland OOO invited over 1500 customers to its repair and warehouse complex in Odintsovo, Moscow Oblast at 10th and 11th of July during the semi-final of 2018 World Cup

Over 1500 of the company's clients and partners visited the event, which was held during the semi-final of 2018 World Cup in Russia and followed the motto 'Liebherr plays in a team'.

Visitors of the event had a chance to have a closer look at the company's repair and warehouse complex in Odintsovo, Moscow Oblast. The exhibition became a center of discussion of key questions with the company's customers, its partners and representatives of the Liebherr Group enterprises. A specialized press-tour followed the event.

During the exhibition, 23 products from various divisions were represented: construction, earthmoving, material handling, concrete technology, components, domestic appliances, crane and port equipment.

The repair and warehouse complex of Liebherr-Rusland OOO opened its doors in 2010. Today it's one of three large Liebherr repair and warehouse complexes in Russia, the others being situated in Kemerovo Oblast and Khabarovsk. Along with over 40 service centers and sales offices in Russia, the repair and warehouse complex provides sales and service for the whole Liebherr equipment program as well as spare parts delivery on the territory of the Russian Federation. The wide network of branches and service centers ranges from St. Petersburg to South-Sakhalinsk.

In Russia, the Liebherr Group is also represented by two factories in Dzerzhinsk, Nizhny Novgorod Oblast. Liebherr-Aerospace Nizhny Novgorod OOO manufactures and assembles key components for flight control systems and actuation systems. Liebherr-Nizhny Novgorod OOO manufactures steel assemblies for earthmoving equipment and

tower cranes, and delivers products to four European Liebherr plants for earthmoving machines in Germany, France and Austria. Furthermore, the company produces crane assemblies to meet the specific requirements of the Russian market. The Nizhny Novgorod plant is also Liebherr' center of the remanufacturing program in Russia, which ensures the prompt replacement of the most important units and units with industrially restored ones.
