

Materials Laboratory of Liebherr-Aerospace Toulouse SAS Accredited by NADCAP

July 2018 – Liebherr-Aerospace Toulouse SAS, center of excellence for aerospace air management systems within the Liebherr Group, has obtained accreditation from NADCAP (National Aerospace and Defense Contractors Accreditation Program) for its Materials Testing Laboratory.

This accreditation follows an audit conducted in early March 2018 by the Performance Review Institute (PRI), which focused on both the overall quality system of the laboratory and the practice of static and dynamic mechanical tests.

NADCAP is a program that aims to gather the requirements of aeronautics stakeholders in unique audits, which are applicable in many special processes. The objectives are twofold: to improve the quality of the products and processes while cutting costs.

The investment of Liebherr-Aerospace Toulouse SAS in this program demonstrates the company's level of commitment to be as close as possible to the demands of the aircraft manufacturers. This certification represents an important step within an overall continuous improvement of quality.

Liebherr-Aerospace Toulouse, center of excellence for air management systems on board

Liebherr-Aerospace Toulouse SAS develops, produces, supplies and maintains air management systems for the aviation industry. Liebherr-Aerospace Toulouse is ranked as one of the world's leading system suppliers and supports aircraft and helicopter manufacturers as well as airlines in their projects.

The company employs 1,300 people at two sites in Toulouse and Campsas (Tarn-et-Garonne), and generated a turnover of EUR 553 million in 2017.

Liebherr-Aerospace Toulouse SAS is a subsidiary of the aerospace and transportation systems divisional control company of the Liebherr Group.

Liebherr-Aerospace is a leading supplier of systems for the aviation industry

Liebherr-Aerospace & Transportation SAS, Toulouse (France), is one of eleven divisional control companies within the Liebherr Group and coordinates all activities in the aerospace and transportation systems sectors.

Liebherr-Aerospace is a leading supplier of systems for the aviation industry and has more than five decades of experience in this field. The range of aviation equipment produced by Liebherr for the civil and military sectors includes flight control and actuation systems, landing gear and air management systems, as well as gears, gearboxes and electronics. These systems are deployed in wide-bodied aircraft, single aisle and regional aircraft, business jets, combat aircraft, military transporters, military training aircraft, civil helicopters and combat helicopters.

Liebherr's aerospace and transportation systems division employs around 5,400 people. It has four aviation equipment production plants at Lindenberg (Germany), Toulouse (France), Guaratinguetá (Brazil) and Nizhny Novgorod (Russia). These production sites offer a worldwide service with additional customer service centers in Saline (Michigan/USA), Seattle (Washington/USA), Montréal (Canada), Sao José dos Campos (Brazil), Hamburg (Germany), Moscow (Russia), Dubai (UAE), Bangalore (India), Singapore and Shanghai (People's Republic of China).
