

All Family of Companies takes delivery of 1,000th Liebherr LTM 1200-5.1 mobile crane produced

- One thousand LTM 1200-5,1 cranes built since 2005
- Company chooses Liebherr based on safety, product engineering excellence and flexibility
- ALL Family of Companies has 36 branches in North America

Newport News, VA (USA), 8 May 2019 – Representatives from Liebherr and the ALL Family of Companies recently celebrated a milestone – the handover of the 1,000th LTM 1200-5.1 mobile crane ever produced. Based in Cleveland, Ohio, the ALL Family of Companies is the largest privately-owned crane rental and sales organization in North America, with 36 branches operating under multiple names – ALL, Central, Dawes, Jeffers and ALT. The safety, product quality and flexibility of the LTM 1200-5.1 were major criteria behind ALL's purchasing decision.

In 2005, Liebherr launched a mobile crane with the longest telescopic boom in the 5-axle class in the form of the LTM 1200-5.1. It is 72 metres long and can also be extended with lattice booms. This means that the 200-tonne crane can reach hook heights of up to 101 metres and radii of up to 80 metres. Over one thousand LTM 1200-5.1 cranes have now been sold around the world, making it one of the most successful cranes in the 5-axle class.

At its launch, the LTM 1200-5.1 was the first mobile crane in the world to feature pneumatic disc brakes. The pneumatic disc brake was installed in the crane axles after joint development between Liebherr and its system partners. Compared to the previously conventional drum brakes, disc brakes delivered improved braking performance and also enhanced braking control and the track stability of the vehicle. Longer maintenance intervals and shorter working times for changing the pads also meant improved economy.

Established in 1964, ALL Crane is a heavy-lift industry leader, offering rental, sales and parts. Their focus includes commercial construction, roads and bridges, power generation and facility

maintenance. ALL was founded by three brothers: Michael C. Liptak Jr., Larry Liptak, and Jake Liptak. The brothers, along with Mike's wife, Marvinne, recognized a customer need, bought themselves a crane, and began renting it. Then they grew the fleet with cranes and trucks they bought and sold at auctions, and a family business was born.

The company founders are still actively involved in core operations. Michael L. Liptak, son of founder Mike Liptak, was named president in 2008. Second and third generations of the family are now in leadership positions, supported by approximately 1,500 employees. "We're honoured to be receiving the 1000th LTM 1200 and pleased to celebrate the moment with Liebherr," said Michael Liptak, president and CEO of the ALL Family of Companies.

"We're committed to having the best crane rental fleet in the North American market," Liptak continued. "To that end, we invest with Liebherr because your engineering excellence matches the excellence we bring to customer job sites. We look for equipment that maximizes road-worthiness, mobility, and efficiency. Our partnership with Liebherr is as much about your machines as your people and, in both cases, you help us deliver the right bundle of value, lift capacity, and flexibility — second only to safety."
