

Delaware-based Active Crane Rentals taking delivery of LTM 1350-6.1 mobile crane

- Addition of LTM 1350-6.1 will be largest crane in the company's fleet
- Family owned and operated company has been in business for 50 years and specializes in daily rentals

Newport News, VA (USA) May 30, 2019 – For more than 50 years, Active Crane Rentals has grown with the surrounding economy in the Tri-State area, supplying cranes, lifting and rigging services in Delaware, Maryland, New Jersey and Pennsylvania. The company is about to grow again by adding a [Liebherr LTM 1350-6.1](#) mobile crane to its fleet.

The company chose Liebherr based on experience and a reputation for excellent design, dependability, lifting capacity and reliability. Ease of operation, mobility and service also influenced their decision. When Active takes delivery of the crane in July, it will be the largest in the company's fleet. The LTM 1350-6.1 is a 400 US ton-class crane with a 230 foot boom and outstanding load and handling capacities.

"Liebherr cranes are reliable, where no expense is spared in creating the most operator friendly machine. This crane will add value to our business through the ability to quickly and safely build the crane," said company treasurer Hunter Schmeusser. "Our new LTM 1350-6.1 is going to be the largest crane in our fleet, as we continue to grow and supply our surrounding communities with the best service available."

Based in Wilmington, Delaware, the state's largest city, a bridge project, water plant reconstruction and chemical plant maintenance jobs are ahead for Active's new crane. Steve Schmeusser is president of the company, which employs about 25 people and has 30 cranes overall, including a Liebherr LTM 1160-5.1 mobile crane.

"Active Crane Rentals is thankful for being able to sustain longevity with the same customers we started out with 50 years ago," said Karen Schmeusser. "Our diversity, reputation and
