## Liebherr MK 88-4.1 mobile construction crane handover in Andalusia

- Handover of new Liebherr mobile construction crane MK 88-4.1
- Customer Grúas Alhambra is satisfied
- Emission-free operation possible, using even less power than the previous model

**Grúas Alhambra, a Spanish lifting and transport service company based in Granada, continues to opt for Liebherr and has taken delivery of a new MK 88-4.1 mobile construction crane.**

Granada (Spain), 1 October 2020 – “This crane allows us to offer outstanding individual solutions. As a mobile and tower crane rental service, we are confident that the MK88-4.1 Plus is the perfect addition to our rental fleet. We are proud to have this Liebherr mobile construction crane as part of our fleet – it gives us security in terms of our day-to-day work,” says Abraham Molina, Alhambra Crane Manager.

Featuring proven MK technology, this mobile construction crane is even more powerful and flexible than its predecessor, the MK 88 Plus. This is particularly evident in luffed jib position, where loads can be lifted to a height of 59.1 metres. New elements include, for example, its different axle load options, which make the crane significantly more economical. The construction machinery manufacturer has also taken the environment into account: the MK 88-4.1 can operate emission-free using even less power than its predecessor. With a jib length of 45 metres, the standard hook height is 30.2 metres. The crane has an 8,000 kg maximum load capacity.

The Andalusian company Grúas Alhambra has been active in the rental of various types of construction machinery since the 1960s, but has over the years primarily specialised in the hire of tower cranes, mobile cranes and truck-mounted loading cranes, with and without crane operators. With its carefully selected rental fleet and high safety standards, the 80-strong company has worked its way to the top of the industry. Grúas Alhambra already has 60 Liebherr tower cranes in its fleet and is now extending this provision with the new Liebherr MK 88-4.1 mobile construction crane.

### **About the Liebherr Tower Cranes Division**

More than seven decades of experience have made Liebherr a recognised specialist for lifting technology on all types of construction sites. The range of Liebherr Tower Cranes encompasses an extensive selection of high-quality tower cranes that are used worldwide. This includes fast-erecting, top-slewing, luffing jib and special-purpose cranes as well as mobile construction cranes. In addition to these products, Liebherr also offers a wide range of services that complete the company's portfolio: Tower Crane Solutions, Tower Crane Customer Service and Tower Crane Center.

### **About the Liebherr Group**

The Liebherr Group is a family-run technology company with a highly diversified product portfolio. The company is not only one of the largest construction equipment manufacturers in the world, but also provides high-quality and user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 140 companies across all continents, engages more than 48,000 employees and, in 2019, achieved a consolidated total revenue of over 11.7 billion euros. Liebherr has pursued its goal of satisfying customers with industry-leading solutions and shaping technological progress since its founding in 1949, in Kirchdorf an der Iller in Southern Germany.
