

Press release

## **Liebherr Performance Days – The Americas: Tech Arena – Where Virtual Meets Reality**

Kempton (Germany), February 2021 – **Experience gear technology and automation systems virtually. Visit us from March 09 - 11, 2021.**

**With the Performance Days, Liebherr created an event that is synonymous with innovation, technology and networking. Liebherr will be using the Tech Arena as a platform to present new products, host live talks and a platform for technological exchange.**

In the Tech Arena is exclusive information about new products and current portfolio in the areas of gear technology and automation systems. In addition, contact persons are available for advice on all product areas and help to develop your technical solution.

In the gear technology product area, Liebherr present with first-of-its-kind innovations, such as the generating gear grinding machine LGG 500 and the gear skiving machine LK 280 DC, as well as many others. You can also learn more about the newly developed clamping technology, SECLA, which will soon provide a perfectly coordinated clamping concept.

In the area of automation systems, Liebherr is also taking on the challenges presented by technological change and introducing the first time the innovative, automated concept for the assembly of battery packs. From the application cell all the way to the complete system, Liebherr is your one stop shop.

The web applications and networking methods Liebherr also offer tailor-made digitalisation solutions for all product areas. The spectrum ranges from simple monitoring applications to far-reaching Industry 4.0 scenarios.

Convince yourself of the solutions, register for the Liebherr Performance Days and step into the virtual Liebherr world. Registration and information at: <https://go.liebherr.com/2njb31>
