

Press release

Liebherr crane package for Krandienst Schulz

- Order for nine mobile cranes with lifting capacities from 60 to 650 tonnes
- Standardisation of mobile crane fleet with Liebherr machines
- Reliable Liebherr service a major criterion behind the decision

Krandienst Schulz GmbH & Co. KG has placed an order with Liebherr for a package of nine mobile cranes with lifting capacities ranging from 60 to 650 tonnes. The new cranes will enable the Hamburg-based company to expand its fleet to meet increasing demand around the city and its new branch in Stade.

Ehingen / Donau (Germany), 22nd February 2021 – The order includes models LTM 1060-3.1, LTM 1070-4.2, LTM 1090-4.2, LTM 1230-5.1, LTM 1300-6.2 and the new LTM 1650-8.1. Company owner Günter Sichward explains: “We are continuing to pursue our strategic plan to standardise our crane fleet. We decided on Liebherr because Liebherr offers the best overall package – powerful machines with innovative technology and uniform operation. Liebherr cranes also retain their value particularly well”.

Managing Director Klaus Schmidt continues: “Liebherr supplies us with mobile cranes featuring engines with the latest emissions technology and particulate filters. The VarioBase[®] variable support base is available for the entire range. All the cranes have the same control interface – which makes it easier for the operators. We also save time and money in the workshop as our personnel only require basic and advanced training from a single manufacturer”.

Krandienst Schulz also appreciates Liebherr’s outstanding after-sales service. “We are only allowed to work on many sites in Hamburg on Sundays and public holidays. Even on those days, a Liebherr service engineer will arrive on site within an hour. He will either bring the right spare parts with him or they will be delivered straight away”, says Schmidt.

Krandienst Schulz now has 27 Liebherr mobile cranes and five MK mobile construction cranes, which, in addition to the construction industry, are also used at the ports, in general industry and petrochemicals. The company also has four loading cranes in various lifting

capacity classes. Speaking about the company's 60-strong workforce, Managing Director Klaus Schmid says: "Our motivated workforce is our company's greatest asset".

About Liebherr-Werk Ehingen GmbH

Liebherr-Werk Ehingen GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler crane chassis deliver lifting capacities of up to 3000 tonnes. With universal boom systems and extensive additional equipment, they can be seen in action on construction sites throughout the world. The Ehingen site has a workforce of 3,500. Extensive, global service guarantees the high availability of Liebherr mobile and crawler cranes. In 2019, the Liebherr plant in Ehingen recorded a turnover of 2.1 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a widely diversified product range. The company is one of the largest manufacturers of construction machines in the world, but also supplies technically advanced, user-focused products and services in many other sectors. The group currently comprises more than 140 companies based in every continent of the world, has a workforce of over 48,000 and recorded a consolidated total turnover of more than 11.7 billion euros in 2019. Since it was founded in 1949 in Kirchdorf an der Iller in southern Germany, Liebherr's aim has been to win customers by supplying high quality solutions and to contribute to technological progress.
