

LIEBHERR

Press release

Liebherr begins construction of new components plant in China

- **The Liebherr-Components product segment continues to expand its presence in Asia**
- **Production start of bearings, drives and hydraulic cylinders planned for end of 2022**

Liebherr-Component Technologies AG has started construction of a new plant at its Dalian site in China. Hence, Liebherr moves forward with the expansion of production of bearings, drives and hydraulic cylinders for the Chinese market.

Dalian (China), September 23, 2021 - Liebherr-Component Technologies AG has started construction work on a new plant in Dalian (China). This will strengthen the Liebherr-Components product segment and further expand its global foothold. Bearings, drives and hydraulic cylinders are due to be produced there by the end of 2022. For that, the Liebherr Components (Dalian) Co., Ltd. will build new halls with three production lines, as well as office and auxiliary buildings on a floor area of around 44,000 m².

A huge potential to supply a wide range of industries

"In order to meet the increasing demand of Chinese plant manufacturers for components for the wind industry and construction machinery sector, we are expanding our local production capacities. In the coming years, we will also supply other industries and applications," explains Fabian Wahl, Managing Director of Liebherr Components (Dalian) Co., Ltd.

Liebherr has been present at the Dalian site since 2002 and is currently manufacturing drive components and earthmoving machinery. With this construction project, Liebherr is not only tying together the production of components in one plant but is also making one of the largest investments in the Dalian region in recent years.

About Liebherr-Components AG

In this segment, the Liebherr Group specialises in the development, design, manufacturing of high-performance components in the field of mechanical, hydraulic and electric drive and control technology. Liebherr-Component Technologies AG, based in Bulle (Switzerland), coordinates all activities in the Components product segment.

The extensive product range includes diesel and gas engines, injection systems, engine control units, axial piston pumps and motors, hydraulic cylinders, slewing bearings, gearboxes and winches, switchgear, electronic and power electronics components, and software. The high-quality components are used in cranes and earthmoving machinery, in the mining industry, maritime applications, wind turbines, automotive engineering or in aviation and transport technology. Synergy effects in s other product segments of the Liebherr Group are used to drive continuous technological development.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product portfolio. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality and user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 140 companies across all continents. In 2020, it employed around 48,000 staff and achieved combined revenues of over 10.3 billion euros. Liebherr was founded in Kirchdorf an der Iller in Southern Germany in 1949. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
