Liebherr Celebrates Over Twenty Thousand Repairs of Aerospace Components in China

Liebherr's footprint in China reached a new milestone with the delivery of its 20,000th unit repaired in the region.

Shanghai (China) – March 2021 – The repair of a flow control valve for an Airbus A320 that belongs to a Chinese operator marks a milestone for Liebherr in China.

Over the past five years, the company has been investing in the development of a growing range of OEM maintenance services on air management systems (ATA Chapters 21 and 36) for various airlines operating Airbus single aisle and long range as well as Bombardier and Embraer aircraft. OEM quality one-stop component maintenance services were also launched for the domestic COMAC ARJ21-700 aircraft operators.

As part of these aerospace services in China, Liebherr built a robust team of more than 40 highly qualified employees consisting of customer service representatives, sales, technical support, quality, procurement and logistics experts. Additionally, its state-of-the-art MRO workshop in Shanghai is staffed with repair technicians, engineers, certifying officials and repair instructors. The site is fully supported by Liebherr-Aerospace centers of excellence in Toulouse (France) and Lindenberg (Germany). This strong collaboration between sites enables the extension of aerospace services for operators in the region.

Delivering the 20,000th repaired component back to a Chinese airline, represents an important milestone for the Liebherr customer service team in Shanghai. Since 2016, the site has more than tripled the number of units repaired - a testament of the company's commitment to continuously supporting operators in their daily maintenance needs while adapting a growing market. The team in Shanghai is unwaveringly committed to quality and growth, while focused on the safe operations of China's civil aviation.

About Liebherr-Aerospace & Transportation

Liebherr-Aerospace & Transportation SAS, Toulouse (France), is one of eleven divisional control companies within the Liebherr Group and coordinates all activities in the aerospace and transportation systems sectors. Liebherr-Aerospace is a leading supplier of systems for the aviation industry and has more than six decades of experience in this field. The range of aviation equipment produced by Liebherr for the civil and military sectors

includes flight control and actuation systems, gears and gearboxes, landing gear and air management systems as well as electronics. These systems are deployed in wide-bodied aircraft, single aisle and regional aircraft, business jets, combat aircraft, military transporters, military training aircraft, civil helicopters and combat helicopters.

Liebherr's aerospace and transportation systems division employs around 6,200 people. It has four aviation equipment production plants at Lindenberg (Germany), Toulouse (France), Guaratinguetá (Brazil) and Nizhny Novgorod (Russia). These production sites offer a worldwide service with additional customer service centers in Saline (Michigan/USA), Seattle (Washington/USA), Montreal (Canada), Hamburg (Germany), Moscow (Russia), Dubai (UAE), Bangalore (India), Singapore and Shanghai (People's Republic of China).

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product portfolio. The company is not only one of the largest construction equipment manufacturers in the world, but also provides high-quality and user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 140 companies across all continents, employs more than 48,000 staff and in 2019 achieved combined revenues of over 11.7 billion euros. Since its foundation in 1949 in Kirchdorf an der Iller in Southern Germany, Liebherr has been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
