Versatile and flexible: LTM 1110-5.1 complements Fagioli crane fleet

- **Fagioli takes delivery of Liebherr LTM 1110-5.1 in Ehingen**
- **Its versatility and high mobility provide valuable support for the Italian company's large cranes**
- **Key purchase criteria: Liebherr quality, safety and long-term reliability**

Fagioli S.p.A. has taken delivery of a new LTM 1110-5.1 from Liebherr-Werk Ehingen GmbH. This crane provides valuable support for Fagioli's large cranes thanks to its versatility, flexibility and high mobility. The company opted for Liebherr's impressive quality, safety and long-term reliability. Another vital factor for the Italian lifting and heavy transport company is the Liebherr support available worldwide.

Ehingen (Donau) (Germany), 11 May 2022 – Italian lifting and heavy transport company Fagioli S.p.A. has taken delivery of an LTM 1110-5.1 from Liebherr in Ehingen. Gabriele Scandolo, asset manager at Fagioli, declared: "The new LTM 1110-5.1 is a perfect addition to our fleet in the lower lifting capacity range." One of the main applications of the new crane will be loading work related to heavy transport. "This type of crane is really manoeuvrable and versatile, making it ideal as an auxiliary crane for our models with high load bearing capacity," explained Scandolo.

Ready to tackle every challenge

The LTM 1110-5.1 has powerful lifting capacities with a 60-metre telescopic boom. Besides this, the rear outriggers are double-stage – thereby attaining a greater support width than the front ones. This means the entire support is trapezoidal. VarioBase® Plus represents the combination of this trapezoidal support with the variable supporting base VarioBase®. What is more, the Liebherr-110-tonner is designed for globally high mobility. The 5-axle model features a variety of different driving conditions – ensuring major advantages for road travel worldwide.

"We consider Liebherr to be the best supplier on the market in terms of quality, safety and long-term reliability," stated Scandolo. "We enjoy good and long-term relationships with Liebherr Management." Liebherr's globally available support is also important to Fagioli.

Founded in 1955 in Sant'Ilario d'Enza (Reggio Emilia, Italy), Fagioli S.p.A. covers the entire logistics chain from heavy transport to heavy lifting projects worldwide with its large fleet. Of its large cranes, 80-90 percent are from Liebherr. The company is mainly active in the oil and gas, construction, energy and renewable energy, shipbuilding, mining and salvage sectors. Since 2017, Fagioli has been part of the

portfolio of the QuattroR investment fund. The Group's headquarters are in S. Ilario d'Enza. There are further centres in Houston (Texas) and Singapore. The Group includes 17 companies – these active on all continents and employing a total of over 500 people worldwide.

About Liebherr-Werk Ehingen GmbH

Liebherr-Werk Ehingen GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler crane chassis deliver lifting capacities of up to 3000 tonnes. With universal boom systems and extensive additional equipment, they can be seen in action on construction sites throughout the world. The Ehingen site has a workforce of 3,800. Extensive, global service guarantees the high availability of Liebherr mobile and crawler cranes. In 2021, the Liebherr plant in Ehingen recorded a turnover of 2.33 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product portfolio. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality and user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 140 companies across all continents. In 2021, it employed more than 49,000 staff and achieved combined revenues of over 11.6 billion euros. Liebherr was founded in Kirchdorf an der Iller in Southern Germany in 1949. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
