

Press release

Liebherr and Aeroman sign heat exchanger maintenance services agreement

Liebherr-Aerospace and Aeroman have announced the signing of a cooperation agreement on maintenance services of heat exchangers. The OEM Liebherr will qualify Aeroman's industrial capabilities to clean and repair Airbus A320 heat transfer equipment developed and manufactured by Liebherr.

Toulouse (France), June 2023 – Liebherr-Aerospace, one of the leading developers and suppliers of systems for the aviation industry and Aeroman (an MRO Holdings Company), industry leader in the Americas in providing airframe heavy maintenance, modification and paint for some of the world's top aircraft owners and operators, have announced the signature of a cooperation agreement on maintenance of heat exchangers on board Airbus A320 aircraft.

Liebherr Aerospace Saline, Michigan (USA) will provide Aeroman with major repair services, including re-cores. Aeroman will thus join Liebherr's worldwide network for heat exchanger maintenance with their strategic location addressing the whole market of the Americas.

"We are pleased to have Aeroman join our network of partners for cleaning, testing and repair of the A320 heat exchangers. We look forward to the collaborative support for airline operators in the region", commented Joël Cadaux, Director Business & Services – Customer Services, Liebherr-Aerospace & Transportation SAS.

"We are confident that our agreement with Liebherr-Aerospace will help us in delivering world-class services to all our customers with Airbus A320 aircraft and look forward to our joint collaboration", added Alberto Alfaro, Director of Operations, Aeroman.

Based in El Salvador, Central America, Aeroman holds airframe capabilities on all major commercial aircraft platforms. The company with over 35 years of experience, has capacity to service up to 46 narrow-body aircraft simultaneously inside its six hangars.

About Liebherr-Aerospace & Transportation

Liebherr-Aerospace & Transportation SAS, Toulouse (France), is one of eleven divisional control companies within the Liebherr Group and coordinates all activities in the aerospace and transportation systems sectors.

Liebherr-Aerospace is a leading supplier of systems for the aviation industry and has more than six decades of experience in this field. The range of aviation equipment produced by Liebherr for the civil and defense sectors includes flight control and actuation systems, gears and gearboxes, landing gear and air management systems as well as electronics. These systems are

deployed in wide-bodied aircraft, single aisle and regional aircraft, business jets, fighter aircraft, defense transporters, defense training aircraft as well as civil and defense helicopters.

Liebherr's aerospace and transportation systems division employs around 6,000 people. It has three aviation equipment production plants at Lindenberg (Germany), Toulouse (France) and Guaratinguetá (Brazil). These production sites offer a worldwide service with additional customer service centers in Saline (Michigan/USA), Seattle (Washington/USA), Montreal (Canada), Hamburg (Germany), Dubai (UAE), Bangalore (India), Singapore and Shanghai (People's Republic of China).

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product portfolio. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality and user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 140 companies across all continents. In 2022, it employed more than 51,000 staff and achieved combined revenues of over 12.5 billion euros. Liebherr was founded in Kirchdorf an der Iller in Southern Germany in 1949. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
