

Press release

Liebherr to exhibit at World of Concrete 2025

- World of Concrete will take place at the Las Vegas Convention Center in Las Vegas, NV from January 21-23, 2025.
- Liebherr concrete technology team will be at booth #C6149.
- Attendees will be able to get hands-on with the 38Z4 XXT truck mounted concrete pump and THS 110 D-K crawler concrete pump.

Liebherr's concrete technology team will be exhibiting at the annual World of Concrete in January 2025 showcasing the 38Z4 XXT truck mounted concrete pump and THS 110 D-K crawler concrete pump.

Newport News, VA (USA), Liebherr USA, Co, November 21, 2024 – Liebherr will participate at World of Concrete 2025 showcasing the [38Z4 XXT truck mounted concrete pump](#) equipped with the latest drive technology as well as the THS 110 D-K crawler pump at booth #C6149. Liebherr will hold a press briefing on January 21st from 8:00 am - 8:45 am at booth #C6149 featuring Liebherr's Divisional Director of Concrete Technology, Guilherme Zurita and the USA team.

"We are thrilled to announce our participation at World of Concrete 2025. We look forward to showcasing our cutting-edge 38 XXT pump, which offers enhanced performance and top-tier operational support solutions, including powerbloc and the XXA stability support system," noted Guilherme Zurita, Director of Concrete Technology. "Liebherr USA's involvement highlights its continuous dedication to advancing the concrete industry. Our booth staff eagerly anticipate meeting customers and their future goals."

38Z4 XXT truck mounted concrete pump

The 38 XXT features a 4-part distribution boom in a convenient Z-fold making it easy to handle and offers an impressive reach for the 30 m class. This model comes standard with XXT-outriggers and an XXA stability assistance system. The pivoting XXT support ensures stability when supporting in tight spaces, and the XXA stability assistance system allows partially supported areas to be electronically monitored. The concrete pump is also equipped with the latest drive unit, powerbloc. This unit does not require a separate control block, as all hydraulic switching and measuring elements are integrated.

Offering an extensive accessories catalogue, the 38 can also be equipped with state-of-the-art LED lighting designs for optimal work in the dark, various storage boxes for materials and tools as well as shelves for extension hoses.

THS 110 D-K crawler concrete pump

The THS 110 D-K crawler concrete pump is ideal for bored pile foundations to supply concrete to any foundation machine. This work involves deep drilling holes to prepare the ground for construction. When the drill is pulled out, these holes are filled with concrete. In the process, the concrete is conveyed down via a tube in the middle of the drill. The crawler concrete pump travels in parallel with the drilling rig to the various pile locations, with the concrete hose remaining connected to the drilling rig. The Liebherr crawler concrete pump is also suitable for various other types of pumping applications.

About Liebherr USA, Co.

[Liebherr USA, Co.](#) based in Newport News, VA provides sales and service on behalf of ten different Liebherr product segments: earthmoving, material handling, mining, mobile and crawler cranes, tower cranes, concrete technology, deep foundation machines, maritime cranes; components, and refrigeration and freezing.

About the Liebherr Group – 75 years of moving forward

The [Liebherr Group](#) is a family-run technology company with a highly diversified product portfolio. The company is one of the largest manufacturers of construction equipment in the world.
