## Endless possibilities with new fully integrated under counter appliances from Liebherr

**Ochsenhausen (Germany), 04.12.2024 – The ideal fit for any kitchen the new under counter appliances from Liebherr-Hausgeräte GmbH offer endless possibilities from niches to islands. They integrate effortlessly into plans, are simple to install and offer impressive features. With a height of 82–88 centimetres, and now also 86–92 centimetres, the new appliances fit perfectly under any worktop. The comprehensive Liebherr portfolio also contains new fully integrated under counter wine fridges.**

With a new, revised under counter portfolio and a wide selection of models, Liebherr-Hausgeräte offers the highest degree of flexibility in kitchen planning. For example, heights between 86 and 92 centimetres are now also on offer for the first time. This new height option is Liebherr's response to the trend towards higher worktops in kitchens. The expansion of the range means that customers can choose from a wide variety of fridges and freezers that will fit snugly under any worktop. Quick and easy installation also makes kitchen planning particularly efficient.

### **New plinth design**

Liebherr's new minimalist plinth design features a smaller ventilation grille and the height-adjustable plinth panels are made of stainless steel. The four legs can be adjusted from the front for easy, optimal alignment of the under counter appliances. In combination, fridges and freezers can be arranged side-by-side without a decor panel. The Liebherr range also includes panel-ready models on which both existing (when replacing) or new (when planning new units) front decor panels can be fitted. Liebherr-Hausgeräte GmbH also offers a neutral stainless steel panel as an accessory.

With the SmartDeviceBox, you can adjust settings or view status messages using your smartphone and SmartDevice app while on the go. The box is included as standard in Prime series and Vinidor Selection series appliances, and is available as an accessory for all other models.

### **The new fully integrated under counter fridges**

All new under counter fridge models feature a Touch & Swipe display – buttons for setting and operation are now a thing of the past. All functions can now simply be selected by tapping and swiping. These compact space savers are just as impressive on the inside. Groceries stay fresh for longer thanks to a flexible interior and EasyFresh (on the Prime series). Divided door shelves offer extra flexibility and convenience. They can be moved and reorganised so that they are at the correct height to access bottles and containers.

In the Pure series, there are six\* models of under counter fridge, including three\* with a 4-star freezer compartment. The Prime series offers three\* models, each with different features and heights.

## **The new under counter freezers**

In these new under counter freezers, VarioSpace offers removable drawers for flexible storage of large frozen goods. The integrated drawer guide makes it easy to slide drawers in and out, even if they are heavily loaded. Innovative Liebherr technology prevents condensation forming between fridges, wine fridges and freezers when they are placed side by side.

## **The new under counter wine fridges**

The revised Liebherr portfolio also includes new under counter wine fridges: They offer the best storage conditions for all wines, even in limited space. The new under counter models with one or two zones are also available in the new height variant of 86–92 centimetres. The Vinidor series offers two models, while the Vinidor Selection series boasts six\* models with varying equipment.

LED light strips on both sides create a unique ambience and offer a perfect view of the wines. One absolute highlight is the dimmable presentation light, which sets the stage to showcase your wines. High-quality wooden shelves complete the interior of the appliances. The removable wooden bars allow customisation to almost any bottle shape for safe and vibration-damped storage of fine wines. To make maximum use of the available space, the lowest pull-out shelf makes it possible to store up to four bottles horizontally. On Vinidor Selection series models, this shelf is combined with a soft-telescopic self-closing mechanism.

All models with a glass door offer unprecedented and unique protection against ultraviolet radiation thanks to UVProtect Plus. Some models include doors with the TipOpen function: A quick tap on the door will open it by a few centimetres, making this function ideal for handleless kitchens. The low noise level of all Liebherr under counter wine fridges means our customers can enjoy their first-class wines in peace.

\*Availability of models may vary by country

## **About Liebherr-Hausgeräte GmbH**

Liebherr-Hausgeräte GmbH is one of thirteen product segments of the Liebherr Group. The Appliances division employs more than 6,800 staff and develops and produces a wide range of high-quality refrigerators and freezers for the domestic and professional sectors at its headquarters in Ochsenhausen (Germany) and in Lienz (Austria), Marica (Bulgaria), Kluang (Malaysia) and Aurangabad (India).

## **About the Liebherr Group – 75 years of moving forward**

The Liebherr Group is a family-run technology company with a broad and diverse range of products. The company is one of the largest manufacturers of construction equipment in the world. However, it also provides high-quality, user-oriented products and services to many other sectors. Today the group comprises over 150 companies from every continent. In 2023, it employed more than 50,000 staff and generated total revenue of over €14 billion. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, its goal has been to win over its customers with sophisticated solutions and contribute to technological progress. The Group celebrated three quarters of a century in 2024 under the motto '75 years of moving forward'.
