Guindastes Tatuapé expands fleet: First LTM 1110-5.2 with LICCON3 in Brazil

- **A first in Brazil: LTM 1110-5.2 with new LICCON3 crane control**
- **Efficiency, performance and technology prove decisive**
- **Over 30 years of cooperation between Liebherr and Tatuapé**

The Brazilian crane and heavy transport company Guindastes Tatuapé has expanded its crane fleet with a new LTM 1110-5.2. The 110-tonne model is therefore the first crane type from Liebherr to be shipped to Brazil with the new LICCON3 control system. Innovative technology, performance and many years of partnership played a key role in the purchase.

Ehingen (Donau) (Germany), 28 January 2025 – With the new Liebherr LTM 1110-5.2 mobile crane, the crane and heavy transport company Guindastes Tatuapé, based in São Paulo/SP, is expanding its fleet further. The company already has several mobile cranes from Liebherr in the 100 to 120-tonne class that deliver efficiency and performance. The five-axle new addition is the ideal complement and will be used in the oil and gas, industrial and mining sectors.

Modern technology and efficiency combined

Guindastes Tatuapé and Liebherr have been close partners for over 30 years. “We really value the trusting cooperation and product quality: Liebherr also provides superb customer support locally”, explains Marcelo Monteiro, Sales Manager at Guindastes Tatuapé. When it came to the procurement of the new Liebherr LTM 1110-5.2 mobile crane, the Brazilian crane company attached great importance to technological innovations and appealing design. The 110-tonne crane, which also sports a new visual design thanks to the switch to the third generation of the LICCON control system, offers both. “The system is intuitive to use, offers fast response times and better visualisation thanks to its large display”, says Monteiro, praising the new crane control system.

The crane also boasts state-of-the-art technologies such as the adjustable VarioBase® Plus support base and modifiable VarioBallast® ballast radius. They make jobs safer and more flexible. The TraXon DynamicPerform ZF gear system ensures greater efficiency and lower maintenance costs. The innovative clutch module allows wear-free starting and manoeuvring.

The outstanding properties of the LTM 1110-5.2 include its high load capacities and powerful telescopic boom. “The 60-metre-long boom achieves tremendous lifting heights, which makes the use of larger and more expensive models of crane unnecessary. The LTM 1110-5.2 is therefore the ideal solution for

efficient lifting operations and allows us and our customers to save money”, says Monteiro, adding: “The crane can carry with it a lot of ballast when driving on roads without needing an additional vehicle for transport. This is another point that helps to reduce costs.”

Guindastes Tatuapé

Guindastes Tatuapé has been active on the Brazilian market for more than 60 years, providing crane rental and special haulage services. The company has relied on innovative technologies from the very beginning and keeps its fleet up to date with ever new crane models. At its headquarters in São Paulo/SP and a branch in the state of Espírito Santo/ES, Tatuapé has a total area of 120,000 m² and employs around 400 people. The fleet size is currently around 400 machines – typically including mobile and crawler cranes, forklifts, lifting platforms, knuckle boom cranes, conveyors and manipulators. The main sectors served by Tatuapé include oil and gas, wind turbines, prefabricated concrete components, mining, petrochemicals, sugar mills and cellulose.

About Liebherr-Werk Ehingen GmbH

Liebherr-Werk Ehingen GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler travel gear deliver lifting capacities of up to 3000 tonnes. With universal boom systems and extensive auxiliary equipment, they can be seen in action on construction sites throughout the world. The Ehingen site has a workforce of 5,000. An extensive, global service network guarantees the high availability of Liebherr mobile and crawler cranes. In 2023, the Liebherr plant in Ehingen recorded a turnover of 2.81 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product programme. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality, user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 150 companies across all continents. In 2023, it employed more than 50,000 staff and achieved combined revenues of over 14 billion euros. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
