Pazoła boosts its crane fleet: Liebherr LTM 1300-6.3 expands service portfolio

- LTM 1300-6.3 impresses with 90-metre boom
- 6-axle crane expands Pazoła's service portfolio
- 10-year partnership with Liebherr

With a Liebherr LTM 1300-6.3, the Polish crane services provider Pazoła is expanding its fleet as well as its portfolio of services. The LTM 1300-6.3's outstanding technical characteristics, especially the 90-metre-long telescopic boom, coupled with the many years of partnership with Liebherr, played a key role in the decision to choose the 6-axle crane.

Ehingen (Donau) (Germany), 12 March 2025 – Dźwigi Pazoła Sp.k., one of the premier providers of crane and lifting services in Poland, has expanded its fleet with a new LTM 1300-6.3 from Liebherr. For the crane services provider, the investment in the Liebherr 300-tonner represents an important element of its corporate strategy and a crucial step towards being able to offer more complex services in the future. "Thanks to its outstanding properties, the mobile crane will enable us to conquer challenging tasks on construction sites efficiently", explains Robert Pazoła (Owner of Dźwigi Pazoła Sp.k.).

Efficiency and flexibility with 90-metre boom

The LTM 1300-6.3 is a versatile, fast-erecting crane from Liebherr that delivers superb performance at high lifting heights. These are characteristics that Pazoła appreciates in the crane. Pazoła cites the remarkable length of the boom in particular as an important aspect: "We are now able to lift heavier loads from longer distances, which significantly boosts our flexibility and efficiency." At 90 metres, it is significantly longer than any other 6-axle model on the market. It is also the longest boom of all mobile cranes that can be carried on the crane on public roads with a 12-tonne axle load.

The new acquisition will primarily be used in the petrochemical sector, wind industry and the construction of tower cranes, since Pazoła is witnessing increasing demand for this. "With the new LTM 1300-6.3, we want to be able to specifically target new customers in these sectors. The crane combines our demands for highly specialist equipment with superlative efficiency and mobility. This makes it ideal for the more challenging projects", adds Pazoła.

10-year partnership with Liebherr

For Pazoła, Liebherr has been a strategically important partner for over 10 years, one that offers first-class service and superb spare parts availability. Of the fleet's 35 mobile cranes, 90 per cent of them come from Liebherr. "Our experience with Liebherr equipment, both for our board of directors and the operators, has been resoundingly positive throughout", explains Pazoła, adding: "We firmly believe that our investment in the LTM 1300-6.3 will further strengthen our company and help us to meet our customers' high expectations."

About Pazoła

Dźwigi Pazoła Sp.k. is a family-run crane company that was founded 35 years ago and which has since strived to constantly grow and innovate. With a dedicated team of 50 employees, the company offers a broad range of crane services. From national projects to long-term international missions, the cranes operate in Poland, Germany and the Netherlands, especially in the mining, chemical and wind energy sectors.

About Liebherr-Werk Ehingen GmbH

Liebherr-Werk Ehingen GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1,200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler travel gear deliver lifting capacities of up to 3,000 tonnes. With universal boom systems and extensive auxiliary equipment, they can be seen in action on construction sites throughout the world. The Ehingen site has a workforce of 5,000. An extensive, global service network guarantees the high availability of Liebherr mobile and crawler cranes. In 2023, the Liebherr plant in Ehingen recorded a turnover of 2.81 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product portfolio. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality, user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 150 companies across all continents. In 2023, it employed more than 50,000 staff and achieved combined revenues of over 14 billion euros. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
