

Press release

Three new Liebherr cranes for Bahrain: Haji Hassan Cranes modernises its fleet

- Haji Hassan Cranes modernises its fleet with one LTM 1160-5.2 and two LTM 1090-4.2 cranes
- Liebherr mobile cranes impress the crane company from Bahrain with their quality, reliability and durability
- Haji Hassan Cranes plan to use these newly added cranes for their upcoming infrastructure development projects in the Kingdom

It is a significant investment for the company, which now has 13 mobile cranes: Haji Hassan Cranes has ordered one LTM 1160-5.2 mobile crane and two LTM 1090-4.2 cranes from Liebherr. The crane rental company based in Bahrain is convinced by the reliability and quality of Liebherr cranes.

Ehingen (Donau) (Germany), 21 March 2025 – Haji Hassan Cranes, a leading crane and lifting company in the Kingdom of Bahrain, has set itself the goal of meeting most of the country's demand for mobile cranes. The company has 30 employees and a fleet that includes all-terrain cranes with lifting capacities from 50 tonnes to 500 tonnes. Manaf Al Sarabi, General Manager at Haji Hassan Cranes explained: "Our previous purchases from Liebherr, the LTM 1500-8.1 and the LTM 1070-4.2, have proved to be a wise decision. Thanks to these cranes, we were able to safely plan and execute a wide range of lifting operations, giving us a competitive advantage in the market."

Liebherr offers reliability and transparency

As part of the modernisation of its fleet, Manaf Al Sarabi is therefore once again relying on the tried-and-tested crane manufacturer: "The outstanding quality and reliability of both Liebherr cranes and Liebherr management are second to none." He emphasises that the support they have received from Liebherr in terms of technical advice and supplies of spare parts has also greatly increased their confidence in the brand. "Liebherr customer service supports us around the clock. We also appreciate their transparency in all transactions," says Manaf Al Sarabi.

Haji Hassan therefore decided to expand its fleet with an LTM 1160-5.2. This crane type will fill the current gap between a 120-tonne and a 300-tonne crane and expand the company's range of services. The LTM 1160-5.2 offers an enormous maximum load capacity of 180 tonnes and is also characterised by its versatile range of applications. The two LTM 1090-4.2s will replace two ageing 80-tonne-cranes

and bring the fleet up to date. “The 90-tonners impressed us with their short set-up time, 60-metre main boom and outstanding lifting performance. This enables us to carry out even the most challenging lifting operations safely and quickly,” reports Deepak Pillai, Operations Supervisor at Haji Hassan Cranes. Both crane types are also characterised by Liebherr's innovative VarioBase® and VarioBallast® technologies.

As Haji Hassan Cranes is involved in almost every major construction project in Bahrain, the new cranes will be used in a wide variety of areas. This includes lifting jobs in oil refineries, steelworks and petrochemical plants, general construction work, the assembly of prefabricated concrete parts, loading work, extensions of sewage treatment plants and the handling of heating, ventilation, and air conditioning systems.

About Liebherr-Werk Ehingen GmbH

Liebherr-Werk Ehingen GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler travel gear deliver lifting capacities of up to 3000 tonnes. With universal boom systems and extensive auxiliary equipment, they can be seen in action on construction sites throughout the world. The Ehingen site has a workforce of 5,000. An extensive, global service network guarantees the high availability of Liebherr mobile and crawler cranes. In 2023, the Liebherr plant in Ehingen recorded a turnover of 2.81 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product programme. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality, user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 150 companies across all continents. In 2023, it employed more than 50,000 staff and achieved combined revenues of over 14 billion euros. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
