LIEBHERR

Press release

# Award-winning French Door appliances from Liebherr now available for retail

**Top-tier quality and design: the new French Door appliances from Liebherr-Hausgeräte GmbH set new standards in the world of fridge-freezers. With generous amounts of storage space, state-of-the-art freshness technologies, high-quality materials and stylish lighting, they combine both functionality and design. First presented to retail at the IFA 2024 and winner of two renowned design awards, the French Door models are now available for customers.**

Ochsenhausen (Germany), 04. September 2025 – Customers who are looking for maximum storage space but want more than just a conventional fridge will love the new French Door appliances from Liebherr-Hausgeräte. The exceptionally spacious fridge-freezers combine freshness with quality down to the last detail and are available in two designs: as a French Door appliance with two freezer drawers or as a French Door fridge-freezer with four doors.

The appliances stand out due to their impressive dimensions and well-thought-out design. With a height of 180.5 cm, a width of 96.2 cm and a housing depth of 63 cm, they offer generous amounts of storage space and can either be installed as a freestanding appliance or in a niche. The refrigeration and freezing specialist is offering its spacious French Door models with a range equipment so that customers can choose the right cooling solution for their needs.

**Outstanding, excellent design**
The French Door appliance series from Liebherr-Hausgeräte has already received two coveted design awards, an iF Design Award 2025 and a Red Dot Design Award 2025. The sleek design and the value-adding freshness technologies of the spacious fridge-freezer won over the two independent juries.

**New fridge-freezers in Liebherr's signature high quality**
With these French Door appliances, the premium manufacturer is expanding its already diverse range of products. The high quality standards are reflected in the build quality featuring high-quality materials and in numerous practical features, for example:

- **Water & Ice centre:** With the Water & Ice centre, cold water, clear ice cubes and crushed ice are available at all times. The personalised filling function allows precise adjustment of the amount of water needed to fill different vessels and is ideal for both spontaneous parties and cozy evenings.

- **FlexDoorSystem**: With the patented FlexDoorSystem, the French Doors can be opened and closed one at a time. The doors open easily and close securely. When closed they are fully sealed, which saves energy.

- **MoodLight**: The MoodLight indirect lighting concept stylishly showcases both the Water & Ice centre and the recessed grips on the freezer drawers. The dimmable lighting creates a sophisticated feel and can be tailored to the individual wishes of the user.

- **Glass and steel interior:** The interior of the appliances is equipped with high-quality glass and stainless steel components, which are not only visually appealing, but also improve the functionality and increase the longevity of the appliance.

- **High-quality materials and elegant colour combinations**: The appliances are available with SmartSteel, TerraSteel and BlackSteel doors and are equipped with attractive side walls painted in silver or black.

**Plenty of space for freshness and flexible storage options**
The French Door appliances are equipped with innovative cooling technologies that ensure long-lasting freshness for your food. BioFresh technology keeps fruit and vegetables fresh for up to five times longer by storing them at ideal humidity and temperatures close to 0 °C. The BioFresh Professional variant with HydroBreeze creates a fine mist that provides an extra kick of freshness. In particular, the VarioTemp zone offers a high degree of flexibility in the way that the available storage options can be used. This flexible zone allows the temperature to be accurately set between −18 and −10 °C for freezing, and between −2 and +5 °C for cooling. For example, customers tend to enjoy having an additional cooling zone for drinks at a party. And if there is anything left of the buffet, there is still plenty of room to freeze the leftovers – nothing needs to be thrown away.

**About Liebherr-Hausgeräte GmbH**
Liebherr-Hausgeräte GmbH is one of 13 product segments of the Liebherr Group. The Domestic Appliances division employs more than 6,000 staff, and develops and produces a wide range of high-quality fridges and freezers for the domestic and professional sectors at its headquarters in Ochsenhausen (Germany) and in Lienz (Austria), Marica (Bulgaria), Kluang (Malaysia) and Chhatrapati Sambhaji Nagar (India).

**About the Liebherr Group**
The Liebherr Group is a family-run technology company with a broad and diverse range of products. The company is one of the largest manufacturers of construction equipment in the world. However, it also provides high-quality, user-oriented products and services to many other sectors. Today the group comprises over 150 companies from every continent. In 2024, it employed more than 50,000 staff and generated total revenue of over €14 billion. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, its goal has been to win over its customers with sophisticated solutions and contribute to technological progress.
