Liebherr deepens cooperation with Röder Präzision for landing gear overhaul

Liebherr-Aerospace and Röder Präzision extend their existing cooperation in the overhaul of the landing gears on board the Embraer E-Jet E1 program.

Lindenberg (Germany), February 2026 – Liebherr-Aerospace Lindenberg GmbH and Röder Präzision GmbH, based in Egelsbach (Germany), are intensifying their cooperation. Accordingly, Röder will overhaul structural components of the main landing gear for Embraer E-Jet E1. Röder already supports Liebherr's MRO business by overhauling parts of the nose landing gear for the same aircraft program.

To support Liebherr-Aerospace, Röder invested in a significant expansion of their machinery, as well as in additional training of their highly specialized employees. In 2026, the overhaul of the structural components will be increased successively.

Gerd Heinzelmann, Managing Director of Liebherr-Aerospace Lindenberg GmbH, explained: "A cooperation like this is a win-win situation for everyone involved: we're already close partners, who support each other. It's important to cover global needs that are sure to arise in the near future. The overhaul is carried out domestically with short delivery routes and we can therefore offer our customers greater capacities and faster turnaround times."

The disassembly, assembly, test and certification of the landing gears will take place at Liebherr-Aerospace in Lindenberg, while individual parts will be overhauled at Röder.

Bastian Heberer, CEO of the Röder Group, commented: "The continued development of our cooperation with Liebherr-Aerospace is built on a long-standing, trust-based partnership. Through targeted investments in machinery and the ongoing qualification of our highly skilled employees, we are further strengthening our contribution as a reliable MRO partner and supporting Liebherr in delivering stable capacities, high quality and short turnaround times for the Embraer E-Jet E1 program."

Liebherr-Aerospace in Lindenberg is with its built supply chain the Original Equipment Manufacturer for the landing gear systems of the Embraer E1 generation of E-Jets.

About Röder Group, Aviation Excellence Since 1922

Röder Präzision was founded in 1922. It is one of the oldest and most traditional aviation companies in Germany. It is renowned for its comprehensive range of services for civil and military aircraft and their components.

The Röder Group is an organization approved by civil and military aviation authorities for design, manufacturing and maintenance. The company develops and produces parts and components for the aviation industry, maintains aircraft and their components, and provides a wide range of aviation-related services to civil and military customers.

The Röder Group has seven sites around the globe, including four in Germany, as well as sites in India, Dubai and the Slovak Republic, and employs more than 450 people worldwide.

About Liebherr-Aerospace & Transportation SAS

Liebherr-Aerospace & Transportation SAS, headquartered in Toulouse (France), is one of 13 product segments of the Liebherr Group and a first-tier provider of on-board solutions in the aerospace and transportation industry, contributing to a more sustainable transport through innovative products, best in class services and performance excellence.

The aerospace product portfolio offered to civil and defense customers includes environmental control and thermal management systems, flight control and actuation systems, landing gears as well as on-board electronics. For rail vehicles of all kinds Liebherr offers heating, ventilation and air conditioning systems, passive and active hydraulic systems for braking, damping, axle steering and levelling. Furthermore, Liebherr serves the commercial vehicle market with trailer cooling systems.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product programme. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality, user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 150 companies across all continents. In 2024, it employed more than 50,000 staff and achieved combined revenues of over 14 billion euros. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, the employees have been pursuing the goal of achieving continuous technological innovation and bringing industry-leading solutions to its customers.
