## 25 years Binkowski: New LTM 1300-6.4 added to the fleet

---

- Binkowski is receiving LTM 1300-6.4 as the first company in Poland
- The modern 300-tonne crane is characterised by its 90-metre boom
- The company has relied on cranes by Liebherr for more than 20 years

**Binkowski had several reasons to be pleased in 2025: The company celebrated its 25th anniversary and added the innovative Liebherr LTM 1300-6.4 to its fleet. Binkowski had several reasons to celebrate in 2025: the company marked its 25th anniversary and expanded its fleet with the new Liebherr LTM 1300-6.4. “We are proud to be the first company in Poland to take delivery of the LTM 1300-6.4,” says Managing Director Przemyslaw Binkowski. With its 90-metre telescopic boom the six-axle crane is designed for high lifting performance at great heights.**

Ehingen (Danube) (Germany), February 6, 2026 – “For us, the investment in the 300-tonne crane is a logical step”, explains Binkowski. “It is a direct response to the dynamic demand of our customers. With the LTM 1300-6.4, we are modernising our fleet and are committed to growth and innovation – just in time for our 25th anniversary.” The new LTM 1300-6.4 is replacing an LTM 1220-5.1 from Binkowski. The 220-tonne crane has served us well for decades. Binkowski explains his reasons for the replacement: “We were always very satisfied with the LTM 1220-5.1. However, we now need higher lifting capacities. Our customers are presenting us with increasingly difficult challenges. Prefabricated components are becoming heavier and need to be lifted further. We are best prepared with the LTM 1300-6.4.”

### **Modernisation and innovation in the fleet**

The LTM 1300-6.4 significantly expands the company’s range of applications. The higher lifting capacities and the telescopic boom with a length of 90 metres were decisive factors. The assembly of prefabricated components in building construction will be the main range of application. In addition, as an innovative company, Binkowski is open to new fields of activity. The focus is, for example, on lifting tasks in the energy sector and the assembly of tower cranes. These are new areas of application that the powerful 300-tonne crane is able to cope with. The LTM 1300-6.4 will be used for assignments both in Poland and in neighbouring countries. Binkowski is thrilled: “The new LICCON3 crane is also equipped with all innovative technologies that ensure both improved performance and more safety. These include, for example, VarioBase® Plus and VarioBallast®, but also the modern driver assistance systems.” These assistance systems include, for example, the moving off information system or blind spot information system. These significantly increase safety during daily driving operations.

For the Polish company, the compatibility of crane accessories represents another significant benefit. Binkowski also has an LTM 1230-5.1 in its fleet and can, for example, use its boom extensions and the tiltable lattice jib on the new 300-tonne crane. “The crane models complement each other ideally. This simplifies our logistics and creates synergy effects”, emphasises Binkowski in terms of the economic efficiency of its crane fleet.

## **Long-standing partnership with Liebherr**

For more than 20 years, the company places its trust in the reliability of the Liebherr brand. The entire fleet – currently consisting of 15 mobile cranes – comes from the Liebherr plant in Ehingen. “Our partnership with Liebherr is based on over two decades of experience and reliability. Liebherr-Polska provides us with excellent support in all areas. The team is an excellent partner for us in terms of service and the availability of spare parts”, reports Binkowski, explaining the decision why he and his company rely on Liebherr cranes.

## **About Binkowski**

Przemysław Binkowski crane service is an innovative company that currently employs 25 people. The company has its headquarters in Śrem, to the south of Posen. Binkowski’s main area of application is assembly work in the field of building construction.

## **About Liebherr-Werk Ehingen GmbH**

Liebherr-Werk Ehingen GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler travel gear deliver lifting capacities of up to 3000 tonnes. With universal boom systems and extensive additional equipment, they can be seen in action on construction sites throughout the world. The Ehingen site has a workforce of 5,000. An extensive, global service network guarantees the high availability of Liebherr mobile and crawler cranes. In 2024, the Liebherr plant in Ehingen recorded a revenue of 3.19 billion euros.

## **About the Liebherr group**

The Liebherr group is a family-run technology company with a wide and comprehensive range of products. The company is one of the biggest construction equipment manufacturers in the world. However, it also offers high-quality, application-oriented products and services in many other areas. Today, the group is made up of over 150 companies on all continents. In 2024, it employed more than 50,000 people and generated a consolidated total revenue of more than 14 billion euros. Liebherr was founded by Hans Liebherr in 1949 in the southern German village of Kirchdorf an der Iller. Since then, the employees pursue the objective of impressing their customers with sophisticated solutions and contributing to technological progress.
