Powerful all-rounders: three LTM 1120-4.1 Liebherr mobile cranes for First Gulf Sky

- 120-tonne cranes close strategic gap between 100- and 160-tonne mobile cranes
- Optimal dimensions and strong load charts for steel structure assembly
- First Gulf Sky plans to purchase five more units of the successor, the LTM 1120-4.2

First Gulf Sky is opting for even greater flexibility, efficiency and performance in industrial applications with three new Liebherr LTM 1120-4.1. The 120-tonne mobile cranes perfectly complement the existing fleet and support the company in demanding projects and the erection of steel structures.

Ehingen (Donau) (Germany), 31 March 2026 – Saudi Arabian company First Gulf Sky has expanded its fleet with three Liebherr LTM 1120-4.1 mobile cranes. With this addition, the crane hire company now covers all applications between 100 and 160 tonnes. “Thanks to its compact dimensions, the LTM 1120-4.1 is ideal for industrial applications. For us, it’s the wild card of the fleet, so to speak, as it can be used flexibly in a wide variety of work situations,” says Ali Saleh Al Faidmah, Owner of First Gulf Sky. For precisely these reasons, the company plans to purchase five more units of the successor model, the LTM 1120-4.2.

“In addition to the assembly of steel structures, the three new cranes will be used in a wide range of lifting applications – for example in industrial plants and steelworks – to carry out maintenance and repairs, replace components or implement conversions,” explains Saleh Al Faidmah. These time-critical operations are technically demanding and often involve heavy and complex lifts.

A perfect addition to the fleet

The LTM 1120-4.1 is the most powerful 4-axle crane on the market: it has the longest boom in its class and enormous lifting capacities in steep positions. These characteristics make the 120-tonne crane extremely flexible and reduce transport costs, as it can be used for applications that would otherwise require 5-axle cranes with the corresponding logistics. “We deliberately chose Liebherr – because of the strong combination of quality, reliability and strong customer service. Liebherr offers unbeatable added value in demanding working environments,” summarises Saleh Al Faidmah. The LTM 1120-4.1 thus plays a central role within the fleet and strengthens First Gulf Sky’s operational performance.

First Gulf Sky is one of Saudi Arabia’s leading companies in the field of crane rental and critical lifting projects in the Aramco and SABIC industrial zones. Since its foundation in 1992, the company has been

carrying out complex lifting tasks and supporting large-scale industrial projects with its many years of technical expertise. Today, First Gulf Sky operates a fleet of around 20 mobile cranes and employs more than 150 people.

About Liebherr-Werk Ehingen GmbH

Liebherr-Werk Ehingen GmbH is one of the leading manufacturers of mobile and crawler cranes. The range of mobile cranes extends from 2-axle 35-tonne cranes to heavy-duty cranes with a lifting capacity of 1,200 tonnes and a 9-axle chassis. The lattice boom cranes on mobile or crawler chassis achieve lifting capacities of up to 3,000 tonnes. With universal boom systems and extensive additional equipment, they are used on construction sites all over the world. 5,000 employees work at the Ehingen site. Comprehensive, worldwide service guarantees high availability of the mobile and crawler cranes. In 2024, the Liebherr plant in Ehingen generated a turnover of 3.19 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a broadly diversified product range. The company is one of the world's largest manufacturers of construction machinery. It also offers high-quality, user-oriented products and services in many other areas. Today, the group comprises over 150 companies on all continents. In 2024, it employed more than 50,000 people and generated consolidated total sales of over €14 billion. Liebherr was founded by Hans Liebherr in 1949 in Kirchdorf an der Iller in southern Germany. Since then, the employees have pursued the goal of impressing their customers with sophisticated solutions and contributing to technological progress.
