High lifting capacity, long reach: new LTM 1300-6.4 for Mert Vinç

- Mert Vinç strengthens its mobile crane fleet with a new 300-tonne Liebherr
- The LTM 1300-6.4 offers versatile applications for industrial and construction projects
- Targeted investment in performance, reach and flexibility

The Turkish crane and heavy haulage company Mert Vinç is expanding its fleet with a new LTM 1300-6.4. The 300-tonne crane combines high lifting capacities, long boom lengths and the new LICCON3 control system with a compact design and flexible configuration options.

Ehingen (Donau) (Germany), 2 June 2026 – With the new LTM 1300-6.4, Mert Vinç is renewing its fleet to expand its range of applications for complex heavy-lift operations. The key factors in the decision to purchase the new 6-axle vehicle were, in particular, its high load capacity of up to 300 tonnes and its versatile configuration options. The LTM 1300-6.4 will primarily be used in industrial facilities, on construction sites and for various project tasks, enabling lifting operations even in confined spaces.

The 6-axle crane features a 90-metre telescopic boom, offering a long reach whilst maintaining a compact design. Thanks to modern technologies such as the LICCON3 control system and the VarioBase®Plus variable outrigger system, the crane adapts to different site conditions – enabling efficient and safe crane operations even in confined spaces.

“In addition to the base unit, we have ordered lattice jibs, a second winch and 7-metre extension sections. Combined with the LICCON3 control system, our new 6-axle crane is ideal for efficient, safe and versatile crane operations,” says company owner Mehmet Eşref Zevzir.

Wide range of features for operational flexibility

The partnership between Mert Vinç and the Ehingen-based crane manufacturer has been in place since 2024. The company’s mobile crane fleet now comprises nine Liebherr cranes. Last year alone, Mert Vinç commissioned four new LTM 1230-5.1 cranes. The LTM 1300-6.4 is now the fifth new addition in a short space of time. “A key factor in our decision to order from Liebherr again is, in particular, the reliability of the cranes and the customer-focused collaboration,” reports Zevzir.

Founded in 1991, Mert Vinç is now one of the established providers of crane hire and heavy haulage services in Türkiye. With a modern crane fleet and around 60 employees, Mert Vinç carries out projects in industry, construction and infrastructure. The new LTM 1300-6.4 will be deployed first in the petrochemical sector and subsequently for the assembly of tower cranes and power lines, as well as for lifting operations in shipyards.

About Liebherr-Werk Eching GmbH

Liebherr-Werk Eching GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler travel gear deliver lifting capacities of up to 3000 tonnes. With universal boom systems and extensive additional equipment, they can be seen in action on construction sites throughout the world. The Eching site has a workforce of 5,000. An extensive, global service network guarantees the high availability of Liebherr mobile and crawler cranes. In 2025, the Liebherr plant in Eching recorded a revenue of 2.83 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a highly diversified product programme. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality, user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 150 companies across all continents. In 2025, it employed more than 55,000 staff and achieved combined revenues of over 14 billion euros. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers.
