

Cabin replacement

Liebherr Transform

LIEBHERR

Liebherr Container Cranes Ltd.

Stronger

Faster

Smarter

Greener

Out with the old, in with the new

Invest in a brand-new, state-of-the-art crane cabin to replace your outdated or damaged one.

Given that this is where a crane's control centre is located, employing as much expertise as possible here makes sense.

We offer a range of cabins to suit the requirements of your crane. These cabins are built to the highest of standards, with maximum attention paid to the operator's active and passive safety. Constructed with a strong, load bearing frame, capable of withstanding the extensive daily usage of a busy port or terminal, the cabins incorporate the latest in materials technology to deliver excellent thermal and sound insulation, making them suitable for work environments with high or low temperatures.

The cabins feature a wide operational view, with floor glass designed to grant the operator maximum visibility allowing for safe and productive operations. In addition, there are practical features such as a fresh air treatment system, an A/C system, and interior dimmable lighting.

Liebherr Transform

Unleash the full potential

Liebherr Transform is the upgrade and modification service from Liebherr Container Cranes Ltd.

Ports and terminals are under increased pressure to reduce costs and boost performance through increased productivity, faster turnarounds and reduction in equipment downtime. This can sometimes result in increased capital expenditure for new equipment.

As a Liebherr Container Cranes customer, you already own the best container handling equipment on the planet. Why not unleash its full potential by upgrading it?

Liebherr Transform uses the best available technologies to make your crane stronger, faster, smarter, greener and ultimately ... better.
