

Undercarriage solutions

Built for durability. Configured for your site.
Supported worldwide.

Available for:

R 9100 - R 9150

R 9200 - R 9250
- R 9300

R 9350 - R 9400
- R 9600

R 9800

Carrier roller

- Bolted on both sides for added structural stability
- Lifetime lubricated, all-weather sealing as standard

Sprocket

- Liebherr-specific surface heat treatment depth to avoid spalling
- High wear resistance for extended service life

Track chain

Available in multiple widths and profiles to match ground conditions and duty cycles

Track tensioning system

Designed to maintain optimal chain tension and prevent track jump over the sprocket across varying operating conditions

Idler

- Liebherr-specific surface heat treatment depth to avoid spalling
- Lifetime lubricated, all-weather sealing as standard

Bottom rollers

- Engineered to prevent high temperatures and wear
- Liebherr-specific surface heat treatment depth to avoid spalling
- Lifetime lubricated, all-weather sealing as standard

What this means for your operation

Lower TCO

Engineered for durability and supported by our Reman programs, Liebherr delivers longer service life and lower cost per hour than third-party solutions.

One-stop undercarriage shop

From supply to support, Liebherr manages it all: one point of contact, one standard of service, one accountable partner.

Tailored to your operation

Liebherr undercarriage solutions can be configured to match your unique site conditions and application.

Service and warranty that makes a difference

Local presence, global expertise

72+ service centres worldwide so parts, expertise and support are close to your operation.

Factory knowledge on site

Our regional teams have extensive knowledge of our machines and are backed by digital support tools and our global network of experienced engineers.

All-in warranty coverage

With coverage that includes parts, labour and travel, we help you plan maintenance with confidence.*

Reduced operational risk

A full replacement process during the warranty period helps minimise downtime, makes maintenance planning easier, and supports smooth site operations.

**Warranty coverage, terms and availability may vary by market.*
