

Undercarriage solutions

LIEBHERR

Mining

When customers invest in Liebherr undercarriages, they are investing in a fully integrated solution designed to support their operations throughout the undercarriage lifecycle, helping to extend service life and maintain consistent performance over time.

What sets Liebherr apart

One OEM partner

From product selection to issue resolution, Liebherr manages it all – one contact, one standard, one accountable partner.

Tailored to each site

Liebherr undercarriage solutions can be configured to suit specific mine site conditions and applications.

Built to lower total cost of ownership

The combination of durable components and life cycle support programs helps extend service life, reduce replacement frequency and support a lower cost per operating hour.

Engineering to rely on

Liebherr undercarriages are built to high standards and continually refined based on field intelligence, engineering expertise and data from millions of operational hours.

Comprehensive warranty support

Liebherr undercarriages come with comprehensive warranty coverage, including parts, labour and travel. If something needs replacing during the warranty period, Liebherr's full replacement process helps minimise downtime, simplify maintenance planning and keep site operations running smoothly.

Local presence, global expertise

95 % of Liebherr's service personnel are based close to customers, supported by Liebherr's global engineering network and extensive technical expertise to deliver fast, precise support.
